

Delivering the sun's  
power to you.

The sun warms us, nurtures us, sheds light on the world around us. Beyond these key benefits, the sun is also an abundant and highly efficient source of renewable energy — more than enough to help power our homes and businesses.

A leader in alternative energy, SolSource Energy is dedicated to helping homeowners and businesses tap into the multiple benefits of solar energy. We offer industry-leading solar system design and installation services, backed by extensive utility and industry experience and solid warranties. Our solutions do more than power your appliances. They also help you:

- **Combat high electricity bills**
- **Protect the environment**
- **Remain energy-independent**

There's never been a better time to harness the power of solar energy. Let SolSource Energy show you how.

With SolSource Energy  
systems, what's good  
for the environment is  
also good for you.

Go to the source -  
the SolSource - today.

Put the power of the sun to work for you with SolSource Energy. Our complete solar energy solutions continue to help homeowners and businesses save significant money while protecting the environment. We can do the same for you. Contact SolSource Energy today to schedule your free consultation.

# solar basics

## Connect to savings.

SolSource Energy specializes in photovoltaic (PV) solar systems, which transform the sun's light into electricity. Our industry-leading systems interconnect to the utility grid, using an inverter to convert DC electricity into utility-grade AC power.

SolSource Energy systems have the power to generate most, if not all of the electricity you'll need. Should your electricity requirements exceed the system's output, the utility company provides the additional electricity. Should your system produce more electricity than you use, you can literally watch your electric meter spin backwards during the day! Our grid-connected systems let you drastically reduce each month's utility bill.

SolSource Energy also provides PV solar systems with a battery option — ideal for customers without easy access to the utility grid, or who want to be unaffected by power outages and black-outs.

Proven technology.  
Lower utility bills.  
Energy independence.  
What could be better?

# benefits

## A renewable, reliable return on your investment.

SolSource Energy delivers the complete benefits of using solar energy.

**Good for the Environment:** *Solar energy is clean, silent and 100% renewable. No emissions or pollutants, no harm to the environment.*

**Smart Investment:** *Using our systems can reduce your monthly utility bills by as much as 50%, or more. With rebates, incentives and tax credits, you can significantly slash installation costs by up to 50%, as well.*

**Energy Independence:** *Generate your own electricity from the sun — a free and abundant source — and reduce your dependence on the utility company, fossil fuels and the volatile energy industry.*

**Reliability:** *Our systems provide a highly reliable source of energy and a long system life, so you'll enjoy free electricity for many years after the system has paid for itself. We also provide a 5 year warranty on the system installation, with a 20 to 25 year manufacturer's warranty on the solar panels.*

**Low Maintenance:** *With no moving parts, our systems are virtually maintenance-free. Installed systems work automatically — no need to turn them on or off.*

**Flexibility and Variety:** *We offer a wide range of industry-leading PV systems, customized to meet any energy requirements and complement any home or business.*

Reduce pollutants, and reduce your utility bills by up to 50%, or more!

# advantages

## Many services. One professional and reliable source.

SolSource Energy is a division of Clean Fuel Connection Inc. (California C-10 Electrical Contractor license #770564), a nationally recognized leader in the alternative energy and clean fuel industry. We offer a network of highly trained system designers and installers qualified to customize the right design for you. We will maximize the return on your solar-energy investment by providing a complete range of value-added support services.

### Consultation Services

During our free consultation process, our professionals perform a free site visit and evaluation, conduct a cost analysis, and submit and adhere to a fixed-price, written estimate.

### Turnkey System Installation and Project Management

Our team is comprised of experienced, highly qualified system designers and licensed electricians. We'll secure all necessary permits and complete utility paperwork. We also offer solid warranties on all our work.

### Rebates and Incentives Assistance

We'll help you take advantage of excellent government rebates and tax credits that can reduce your up-front system costs by over 50%.

### Post-installation Monitoring

Every system comes with a meter that allows you to track its performance. To help you measure the return on your investment, we also offer optional web-based reporting. Ask about our maintenance packages as well.
